

LogiChem 2010 will be in its 9th year and is the chemical industry's annual supply chain management conference, each year attracting over 250 senior logistics and supply chain executives from bulk and specialty chemical manufacturers.

The conference addresses every critical concern to chemical supply chain professionals, from the current shortage of transport and storage capacity to topics including demand planning, collaboration and growing markets such as the Middle East, through case studies by the industry's leading and most innovative shippers. LogiChem is the only event that brings together all the key suppliers and logistics practitioners in Europe.
